JAVIER ALQUINGA

Remote – Global | Full Remote | Contract | Projects

Spanish (Native) | English B1 (B2 in progress)

PROFESSIONAL SUMMARY

Senior Adobe Experience Manager (AEM) Developer and Architect with over 10 years of experience designing, developing, and implementing enterprise-level digital platforms on AEM (On-Premise, AEM 6.5, and AEM as a Cloud Service). Proven track record delivering high-scale, mission-critical projects for multinational corporations and financial institutions including The Coca-Cola Company, Banco Estado de Chile, Profuturo México, and Rentik España. Expert in Adobe ecosystems, scalable architectures, CI/CD best practices, and AI-enhanced development workflows. Experienced in collaborating with distributed teams using agile methodologies.

CORE COMPETENCIES

Adobe Ecosystem: AEM 6.5, AEM as a Cloud Service, Sling, OSGi, JCR, HTL (Sightly), Adobe Cloud Manager, Dispatcher
Development: Java, JavaScript (ES6+), Node.js, React, Next.js, HTML5, CSS3, Tailwind CSS
DevOps & Tools: Git, GitFlow, CI/CD Pipelines, Maven, REST APIs, Jira
AI & Productivity: Claude Code (AI-assisted development), AI-driven refactoring and optimization workflows
Methodologies: Agile/Scrum, Remote collaboration with international teams

PROFESSIONAL EXPERIENCE

Senior Adobe AEM Developer / Architect

Remote | International Projects | 10+ Years

Rentik España (3 years)

• Architected and developed AEM-based web platform and digital funnel solutions, improving customer acquisition and conversion rates
• Implemented server-to-server tracking systems with AWIN affiliate marketing integration
• Configured Dispatcher caching and performance optimization, reducing page load times significantly

Profuturo México (3 years)

• Led development of comprehensive AEM digital ecosystem for retirement services platform
• Designed and implemented reusable component library using HTL (Sightly) and Sling Models
• Integrated REST APIs with external core banking systems ensuring seamless data flow

Banco Estado de Chile

• Developed financial portals and banking solutions on AEM platform meeting strict security and compliance requirements
• Designed content workflows, templates, and authoring policies for editorial teams

The Coca-Cola Company

• Contributed to corporate AEM platform development supporting global brand presence
• Collaborated with UX, business, and stakeholder teams across multiple regions

KEY ACHIEVEMENTS

• Successfully executed AEM migrations and upgrades from On-Premise to Cloud environments
• Supported CI/CD pipelines using Adobe Cloud Manager, streamlining deployment processes
• Leveraged AI tools (Claude Code) for code refactoring, optimization, and accelerated debugging, increasing development productivity
• Managed sprint planning, task tracking, and release coordination using Jira
• Delivered scalable, maintainable solutions with focus on quality and long-term sustainability

VALUE PROPOSITION

• Enterprise AEM experience with multinational corporations and banking institutions
• Senior/Lead/Architect-ready profile with technical depth and business vision
• Enhanced productivity through AI-assisted development workflows

• Excellent fit for remote-first companies and distributed international teams
